

# Senior consultant with gas and hydrogen expertise (all genders welcome)

## Your key tasks will be:

- Dealing with issues and key topics of high relevance to the strategic orientation and business models of our clients
- Analysis of the development of gas markets and gas transport networks
- Analysis of industrial developments, especially in the chemical sector, with relevance to sector coupling and decarbonization
- Market analyses in the gas and industrial sector with focus on electrolyzers and large-scale industrial clusters
- Regulatory analyses for customers in the European gas industry involving political decision makers and regulatory authorities
- Assessment of gas networks, gas capacity allocation and utilization mechanisms and gas market design
- Development of a regulatory and policy framework for the implementation of the German government's hydrogen strategy

## Your Competences include:

- Experience in the energy industry or energy industry consulting with focus on gas markets
- Expertise in market design of gas and hydrogen markets
- Excellent analytical, conceptual and communication skills
- High motivation and commitment, a high degree of personal initiative
- Excellent degree, fluency in spoken and written English

## This is what we offer you:

- Challenging projects, both in terms of content and technical orientation as well as the complexity and sensitivity of the topics
- A very high degree of personal freedom and responsibility
- The possibility of cooperation and networking with the executives of the German and European energy industry
- The collaboration in a highly motivated and qualified multidisciplinary team
